

Purdicom

Wireless Cloud & Security Distributor
Wantage, Oxfordshire

Details

Size: 150 Sq m

Value: £15.5K

Duration: 4 weeks

The Brief

Commissioned by the IT Distributor Purdicom, both Meridian Interiors and Meridian Office Furniture were involved in this project to create a new, contemporary office space in the client's Oxfordshire-based headquarters: a beautiful oak-beamed barn.

Project Scope

- Glass partitioning
- Redecoration and branding
- Office furniture

Group Companies Involved

- Meridian Interiors Ltd
- Meridian Office Furniture Ltd

Our Solution

Having been awarded Purdicom's £8K contract for partitioning works, Meridian Interiors' project team installed a glass sliding door below an oak beam - creating office space to the rear section of the barn. Infill and scribing was then applied around the timber beams and a film of the client's logo was designed for the glazing.

A separate phase of work involved the office fit-out by Meridian Office Furniture: comprising 18 workstations, as well as the space planning and fit-out of a separate manager's office.

Throughout, the focus was to ensure the design was in keeping with the barn environment and that any disruption was minimised. Purdicom has subsequently commissioned Meridian Interiors/Meridian Office Furniture for the refit and refurbishment of other office buildings within their complex.

“The professionalism and proactivity of the project team was second to none and we were delighted with the transformation of this very unique environment into a fully functional workspace. We continue to enjoy an ongoing relationship and to commission both Meridian Interiors and Meridian Office Furniture for a range of design and re-fit projects across the business.”

Hugh Garrod, Managing Director, Purdicom
